All Purpose Planting & Growing FOOD

Every flower, shrub, and vegetable in your yard will be stronger and look better with regular feeding. Lilly Miller ALL PURPOSE PLANTING & GROWING FOOD makes it easy to give your plants the right combination of plant foods to grow beautiful, lush foliage, lots of colorful flowers, and baskets of delicious tomatoes, corn, and melons.

Lilly Miller blends natural ingredients with traditional plant foods to produce a unique fertilizer that provides nitrogen from four different sources. We've added a mix of nutrients that are available to the plants quickly to help get them off to a great start. We've added others that last longer to keep on feeding steadily in your garden for up to six weeks. All Purpose Planting & Growing Food also adds extra minerals, so plants are never hungry for these essential elements. All Purpose Planting & Growing Food can be used at planting time and every six weeks throughout the growing season. It is ready to use and does not need to be mixed with water.

HOW DO I USE THIS PRODUCT?

When planting a vegetable garden, flowerbed, or hedge: Sprinkle 1-1/2 cups of All Purpose Planting & Growing Food evenly over each 50 sq. ft. (5' x 10') of area to be planted. Mix it into the soil to a depth of 3 - 6 inches, along with any compost or other soil amendments you are adding.

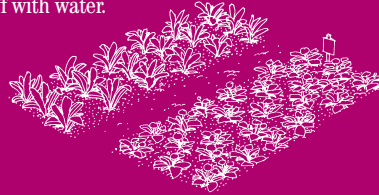

For a single vegetable plant, for individual perennials or herbs, and for planting in containers: Mix 1 tbsp. of All Purpose Planting & Growing Food into the soil at the bottom of the planting hole before you set in the plant.

When planting a single shrub: Mix 3 tablespoons of All Purpose Planting & Growing Food into the soil at the bottom of the planting hole. Do not let the roots directly touch the plant food. Feed again in about six weeks.

For established vegetable gardens and flower beds: Sprinkle 2/3 cup All Purpose Planting & Growing Food alongside every 25 feet of row. Keep the plant food at least three inches away from the plants.

Use 2/3 cup of All Purpose Planting & Growing Food for each 25 sq. ft. (5' x 5'). Sprinkle plant food around plants. Keep it off leaves or wash it off with water.

For shrubs and ornamentals: Use 1-1/2 cups of All Purpose Planting & Growing Food over each 50 sq. ft. (5' x 10') of area. Sprinkle plant food evenly over the soil or mulch.

For a single shrub or bush: Use 2/3 cup All Purpose Planting & Growing Food per plant for most shrubs. Use 1 cup for plants over 6 feet tall. Sprinkle the fertilizer in a ring around the bush, 6 -12 inches from the trunk. For larger specimens, sprinkle at drip line.

After putting fertilizer down, mix it lightly into the surface of the soil, where possible. Be careful not to damage roots. Always water the plants and soil well, after adding fertilizer.

Over-feeding tomatoes, peppers, melons, squash, and flowers can give you fewer blooms and smaller fruit with less flavor. So, don't be tempted to "give it a little more".

OUR COMMITMENT TO YOUR SATISFACTION: If you are not happy with the way this product works in your garden, please let us know. We will be happy to replace the product, refund your money, or substitute another Lilly Miller product. Simply send your name, address and proof of purchase to the address shown.

ABOUT OUR SPECIAL FORMULA...

10% N Nitrogen

We use 4 sources of nitrogen — two for quick, lush growth, and two slow release forms for feeding that lasts up to six weeks.

10% P₂O₅ Available Phosphate

We add extra phosphorus, the key to bright, abundant flowers and great-tasting fruit.

10% K₂O Soluble Potash

Potassium (potash) helps plants resist drought and effects from excessive temperatures.

The other minerals in this premium formula improve plant color, vigor, and strength to give you the lush garden you want.

PROTECT YOURSELF, PROTECT YOUR PETS

This product contains animal manures and/or byproducts that may attract dogs or other pets. Consumption of this product may make animals sick. To minimize potential problems: 1) Store away from pets, 2) Thoroughly mix into soil to eliminate large clods or surface exposure of product, 3) Do not apply this product along with pesticides.

Please wash hands and exposed skin with soap and water after using this product.
