Bulb & Bloom FOOD

From the earliest crocus, to brilliant gladiolus, to the sparkling colors of summer anemones, your bulbs need a special combination of plant foods to bloom their brightest and grow their best, and then come back year after year. It's easy to give them what they need, with Lilly Miller BULB & BLOOM FOOD.

Lilly Miller blends natural ingredients with traditional plant foods to produce a unique fertilizer that provides nitrogen from four different sources. We've added a mix of nutrients that are available to the plants quickly to help get them off to a great start. We've added others that last longer to keep on feeding bulbs steadily for over four weeks. Bulb & Bloom Food also adds extra minerals, so flower bulbs are never hungry for these essential elements.

For bulbs of all kinds, use Bulb & Bloom Food at planting time and again as flowers fade. Bulb & Bloom Food is ready to use and does not need to be mixed with water.

HOW DO I USE THIS PRODUCT?

When planting a whole bed or border of bulbs: Sprinkle 3-1/2 cups of Bulb & Bloom Food evenly over each 50 sq. ft. of garden area (5' x 10'). Mix it into the soil to a depth of 3 - 6 inches, along with any compost or other soil amendments you are adding.

Planting depth varies widely, depending on the type of bulb. Check bulb packet or with local nursery, for correct planting directions for the bulbs you chose.

BULB PLANTING CHART

1	Anemone	Crocus		
2	Freesia	Sparaxis	Ranunculus	Narcissus
3	Gladiolus	Hyacinth	Bulbous Iris	
5	Tulip	Daffodil		
7				

When planting one bulb at a time: Mix 1 tablespoon of Bulb & Bloom Food into the bottom of the planting hold. Drop in a handful of soil and place the bulb. Do not let the bulb directly touch the plant food.

For a bulb bed or border: Use 3/4 cup Bulb & Bloom Food for every 12 sq. ft. (3' x 4'). Sprinkle it around bulbs. Keep fertilizer off leaves. Mix Bulb & Bloom Food lightly into surface of the soil, but do not disturb plant roots.

For individual bulbs: Sprinkle 1-2 tbsp. of Bulb & Bloom Food in a circle around the plant. Keep plant food away from the leaves or stems. Mix it lightly into surface of the soil, but do not disturb plant roots.

After bulbs are finished flowering, allow leaves to die down naturally. They are storing up food for next year's flowers. After six weeks, leaves can be cut off.

Always water planting beds well after adding fertilizer.

OUR COMMITMENT TO YOUR SATISFACTION: If you are not happy with the way this product works in your garden, please let us know. We will be happy to replace the product, refund your money, or substitute another Lilly Miller product. Simply send your name, address and proof of purchase to the address shown.

Derived from bone meal, dried poultry waste, alfalfa meal, treble superphosphate, ammonium phosphate, ground limestone, muriate of potash, calcium and sodium borate, iron sucrate, manganese sucrate, sodium molybdate, zinc sucrate.

*1.7% slowly available nitrogen from bone meal, dried poultry waste and alfalfa meal.

F1475

ABOUT OUR SPECIAL FORMULA...

4% N Nitrogen

We use 4 sources of nitrogen – one for quick, lush growth, and 3 slow release sources of nitrogen for slow feeding.

10% P₂O₅ Available Phosphate

We add extra phosphorus, the key to bright, abundant flowers.

10% K₂O Soluble Potash

Potassium (potash) helps plants resist drought and effects from excessive temperatures, while fortifying the bulb for the next season's blooms.

The other minerals in this premium formula improve plant color, vigor, and strength to give you the garden you want.

PROTECT YOURSELF, PROTECT YOUR PETS

This product contains animal manures and/or byproducts that may attract dogs or other pets. Consumption of this product may make animals sick. To minimize potential problems: 1) Store away from pets, 2) Thoroughly mix into soil to eliminate large clods or surface exposure of product, 3) Do not apply this product along with pesticides.

Please wash hands and exposed skin with soap and water after using this product.

NOTICE – This product contains Arsenic, Cadmium, Chromium, Cobalt, Lead, and Nickel, chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
